

## Together we help our customers get ready for the future:

“Our collaboration aims to empower you to transform your end-to-end blister center by providing integrated solutions to automate your logistics processes.

Innovations can be used to deliver more efficient and better-controlled performance to your blister center with fewer specialists and higher quality”.

– **DDInnovations & GPI RIEDL**

We believe that our experience put into action is the innovation that brings health & wealth to all of us.

With 15+ years of experience, DDI and GPI RIEDL know the market like no other. We aim to simplify and aid the automation process of medications, pharmacies, and blister centers. Together, we further enhance the efficiency and safety of pharmaceutical production and distribution processes, with a particular focus on personalized care for patients worldwide.

 DDInnovations

 RIEDL

## DDInnovations

Made in the Netherlands, DD also stands for 'Dutch Design'. We're based in the Netherlands and design our systems and software ourselves. The DDI solutions are made of European materials only and based on proven technology.

## RIEDL Phasys

RIEDL Phasys is the system for automated dispensing of drugs in pharmacies, resulting from the partnership between a group of German engineers who have been working in pharmacy automation for over twenty years.
